Flutterwave,  
Nigeria,  
20th September 2021,

Dear Chika,

RE: APPLICATION FOR A SOFTWARE DEVELOPMENT INTERNSHIP

I am Shadya Obuya, an entry-level software developer. I am writing to apply for an Internship position at Flutterwave.

The underpinning factor for every successful transaction is trust. I am intrigued by how Flutterwave is at the forefront of ensuring a trustworthy and seamless payment system in Africa. As a progressive individual, I love the impact Flutterwave is making towards connecting people and their resources. Flutterwave is hailed to be one of the leading fintech platforms on the continent and being part of the team will help me grow my skills as well as be part of building a bigger, better, and more prosperous future for Africa.

In the last few months, I have been working on a reward system that leverages blockchain technology. The system will be incorporated into institutions to aid in running a trustworthy rewarding system. I'm also taking a cloud computing course; AWS Certified Cloud Practitioner which will provide me with relevant skills to work in the fintech industry.

Regards,  
Shadya Obuya.
