Dear Jihan,

RE: APPLICATION FOR A SOFTWARE DEVELOPMENT INTERNSHIP

I am Shadya Obuya, an entry-level software developer. I am writing to apply for an Internship position at Lami Technologies.

I am an admirer of how Lami Technologies is trying to remodel the insurance ecosystem by providing flexible, affordable, and tailored insurance coverage to its consumers. I love the impact Lami Technologies is making by creating insurance products that are more accessible and affordable to underserved populations. Being part of the team will help me grow my skills as well as be part of building a bigger, better, and more prosperous future for Africa.

In the last few months, I have been working on a reward system that leverages blockchain technology. The system will be incorporated into institutions to aid in running a trustworthy rewarding system. I'm also taking a cloud computing course; AWS Certified Cloud Practitioner which will provide me with relevant skills to work in the insurtech industry.

Regards,
Shadya Obuya.
